# Sustainable solutions that make business sense

At Twinsaver, sustainability and the environment are at the heart of our business, which is why we are on a journey to deliver sustainable and environmentally friendly processes and products.

The Green Choice range by Twinsaver aims to help you meet growing concerns for the environment with sound, eco-friendly and cost-effective product choices that deliver on the quality and performance you expect.

**Look for the Green Choice Smart Choice mark on our products to know you are taking a step to making a big difference.**

## Biggest recycled fibre manufacturer and brand

Twinsaver is the largest tissue manufacturer and **the largest user of Recycled paper fibre** in Southern Africa, fibre that's used in our 100% Green Choice range. We only use high quality 100% Recycled fibre grades in our manufacturing process.

## 2. Job creation

All material used in our Recycled fibre range is **collected through informal recycling collectors**, providing sustainable incomes to communities in need, while **extending the lifespan of landfills**.

## 3. Water wise and energy efficient

In the last financial year, we achieved a **5% reduction in the use of electricity** and **over 10% reduction of total water usage** across all manufacturing sites. We set annual targets, which we continuously strive to achieve.

## 4. Sustainability

Our tissue and soap products are **100% biodegradable**. Our toilet tissue is septic tank safe.

## 5. Responsible waste management

The by-product from our 100% Recycled paper manufacturing process is **disposed of in an environmentally friendly manner** i.e. it is used in the manufacture of bricks, as opposed to being sent to landfill sites.

## 6. Recyclable packaging

We **use recyclable poly packaging** across the Twinsaver range to integrate our product usage with our clients' recycling initiatives.

# The facts about Recycled Fibre

## What is Recycled fibre and what does it comprise?

Recycled fibre comes in various forms e.g. news print, corrugated cardboard boxes, magazines, office waste paper etc.

## What type or quality of Recycled fibre do we accept in our plants?

Our Recycled fibre products use Latex-free Office Waste Paper (SMX/HL1) & Latex-free Magazines (SBM).

## What are the benefits of the process of collection or manufacture Recycled fibre if any?

Recycled fibre is energy efficient and conserves natural resources. In other words, growing forests + cutting down trees + pulping + bleaching + manufacturing virgin pulp uses more energy than making paper from Recycled fibre.

## What makes our Recycled fibre superior?

Our mills demand only the best quality Recycled fibre as raw material inputs to produce a high quality finished product. We have invested in modern processing equipment that is able to efficiently clean recycled fibre.

## Is Recycled fibre better than Virgin fibre?

Recycled fibre has very good inherent fibre qualities, which make it more suited to toilet tissue as a product. Virgin fibre often requires additional fibre inputs to generate qualities such as softness etc. Recycled fibre is also a source of employment that benefits thousands of informal collectors.

## Are whiter tissue products better?

Whiter may not necessarily mean Virgin fibre although better results can be achieved with Virgin fibre if this is a key parameter. It is more important that there are minimal / no visible ink spots (perceived to be dirt spots) on a tissue product, which Twinsaver ensures, delivering one of the best quality Recycled fibres in the market.

# What's **BRIGHTER** than white?

## Making a planet friendly paper choice!

### WE WON'T WHITEWASH THIS FACT:

- Any paper made from Recycled fibre is rarely as white as a roll made from Virgin fibre.

### WHY GREEN CHOICE IS THE ONLY CHOICE FOR THE FUTURE:

- Soft
- As bright as our nearest competitor
- ISO 9001
- PLUS 10% thicker than comparable Virgin fibre 1-ply toilet paper\*
- Strong
