Our sustainability approach

Creating value through sustainability

For Tork, sustainability is about more than the environment. It’s about delivering practical benefits for people and adding value to your business, every day. Tork makes sustainability work for you.

Our approach is about benefiting people, by improving hygiene and ease of life and benefiting nature, through reducing environmental impact across the product lifecycle. It all adds up to greater value, by helping you use less, waste less and achieve lower costs.

Save time and effort with packaging that’s easier to handle

Tork Easy Handling™ packaging is designed to make handling easier for everyone. The smart design means that:
- Boxes are easy to carry, thanks to convenient, comfortable grips
- Boxes are easy to open without a knife, thanks to taped sealing
- Carry bags are easier to hold, thanks to convenient handles
- Used, flattened boxes are easy to carry in large numbers

Reduce waste and usage

High quality paper towels absorb more moisture quickly, so you use less and waste less.

Making skincare accessible to all

Tork skincare dispensers are easy to use for everyone, even for people with reduced hand strength such as the elderly and children.

Save time with easy product choices

75% of Tork products in EU carry a recognised third party Eco-label. You can select Tork products with confidence, knowing that they meet high environmental standards set by an independent organisation.

Responsibly produced paper products from a sustainable company

SCA, the maker of Tork, has environmental management accreditations such as ISO 14001 in 85% of its tissue production plants. SCA is recognised by many external indices and rankings as a sustainable company.

Reduce consumption with dispensing systems that control use

Using Tork Xpressnap® system reduces serviette usage by at least 25% compared with traditional serviette dispensers, cutting consumption and waste.
Washroom
Making washrooms work for your business
Our tried and tested combinations are based on our customers’ common needs. Whether you want to make an impression, show you care for your visitors, maintain hygiene standards or keep control of costs, we’ve got something that’s right for you.

What works best for your business?

Checking traffic levels
How often you need to maintain and refill your washroom depends on how many people visit between cleaning cycles.

To help find what works best for your business, use these two categories of traffic volume:

- **Low/Medium traffic**
  For small or medium washrooms with low/medium visitor numbers and regular maintenance cycles.

- **High traffic**
  For larger, busier washrooms with a high volume of visitors.

We develop our product ranges to match the different needs of our customers.

Find the right product for your washroom based on your traffic level and your washroom profile:

- **Wow Factor style washroom**
  - When making an impression is important

- **Washroom Plus**
  - For extra care and services

- **Essential washroom**
  - For basic washroom needs

- **Hygiene critical washrooms**
  - When hygiene is critical

Wiping and cleaning
The easy choice for the best result
Helping you to choose the right product

What works best for your business?

We develop our product ranges to match the different needs of our customers.

Find the right product for your workplace based on these three simple questions:

**What task do you need to do?**
Do you need a wiper or cloth for dry or wet wiping, for cleaning to remove oil and grease, or for polishing?

**What type of working space or workstation do you use?**
Are you at a workstation where you and others need equal access to a dispenser, or do you need to move wipes around to carry out different tasks?

**How often does this task get done, and by how many people at once?**
Do several people use wipers or cloths during the day, or does one person occasionally need to use them?

What we offer

We’ve got a comprehensive range of specialist wipes and cloths, each designed to perform for a specific task. Add one of our dispensers to create an efficient system that controls consumption and cost.

**Wiping**
Wiping is mopping up spills, soaking up liquids and picking up dirt and dust with paper.

**Cleaning**
Cleaning is removing dirt and stains from surfaces, machines or tools with cloths that are dry or used together with water, solvents or detergents.

**Polishing**
Polishing is creating a protected and shiny surface with the help of a cloth that applies polish onto the surface and is then rubbed to obtain a good finish.
